Theoretical studies in the realm of chemical reactivity: Non-catalytic and catalytic reactions 265
Zamaraev, K.
New possibilities of NMR in mechanistic studies of homogeneous and heterogeneous catalysis 275
Zambelli, A., see Pellecchia, C. 57
Zucchini, U., Dall'Occo, T. and Angelini, A.
Behaviour of $[Ti_2(OEt)_8Cl]_2Mg_2(\mu\text{-}Cl)_2$ as catalyst component in the Ziegler–Natta polymerization of α-olefins and diolefins 45

Subject Index

acid centres
Cluster models for Brønsted acid centres in faujasites 347
adsorbates
Ligands on clusters - adsorbates on surfaces 195
adsorption
Adsorption and reaction of molecules on surfaces of metal–metal oxide systems 143
Theoretical investigations on adsorption at ion crystal surfaces 171
Adsorption of toluene on vanadium pentoxide surfaces. Quantum chemical study 457
alkali-metal surface
Dipped adcluster model and SAC-CI method applied to harpooning, chemiluminescence and electron emission in halogen chemisorption on alkali metal surface 211
alkylperoxo complexes
New possibilities of NMR in mechanistic studies of homogeneous and heterogeneous catalysis 275
alkyltitanocene complex catalyst
From ring-opening metathesis polymerization to Ziegler–Natta polymerization: a method for obtaining polynorbornene–polyethylene block copolymers 103
aluminium NMR spectroscopy
Characterization of alumoxanes by ^{27}Al-NMR spectra 93
aluminoxane
Behaviour of $[Ti_2(OEt)_8Cl]_2Mg_2(\mu\text{-}Cl)_2$ as catalyst component in the Ziegler–Natta polymerization of α-olefins and diolefins 45
alumoxane characterization
Characterization of alumoxanes by ^{27}Al-NMR spectra 93
ammonia oxidation
Quantum chemical study of the reaction of ammonia with transient oxygen species 353
analytic cluster model
Extension of the range of applications of classic-phenomenological laws to the field of matter in a highly dispersed state 361
bimetallic chloroalkoxide
Behaviour of $[Ti_2(OEt)_8Cl]_2Mg_2(\mu\text{-}Cl)_2$ as catalyst component in the Ziegler–Natta polymerization of α-olefins and diolefins 45
bis-2-ethylhexylphthalate
Role of electron donor in propylene polymerization using magnesium chloride-supported titanium tetrachloride catalyst 11
butadiene
Homopolymerization and copolymerization of butadiene with a neodymium catalyst 83
1-butene
Time conditions for chemical reactions at the mesoscopic level in the elementary catalytic system 1-butene on ZnO 327
butylethylmagnesium alkylating agent
A useful method for the synthesis of neodymocene homogeneous catalysts for ethylene polymerization 75
catalyst
Non-metallocene group 4 organometallic complexes as catalysts for olefin polymerization: synthesis and catalytic activity of the cationic complex $[Zr(CH_2Ph)_3]^+$ $[B(CH_2Ph)(C_6F_5)_3]$ 57
cationic complex
Non-metallocene group 4 organometallic complexes as catalysts for olefin polymerization: synthesis and catalytic activity of the cationic complex $[Zr(CH_2Ph)_3]^+$ $[B(CH_2Ph)(C_6F_5)_3]$ 57
charge sensitivity analysis
Charge sensitivity analysis of oxide catalysts: oxidation-state dependence of the normal-mode description of V_2O_5 surface clusters 383
Charge sensitivity analysis of oxide catalysts: TiO_2(110) and (100) surface model clusters and H_2O adsorption 407
charge stability
Qualitative charge stability and Fukui function analysis of a model system with

implications for chemical reactivity 371
chemical reactivity
Theoretical studies in the realm of chemical reactivity: Noncatalytic and catalytic reactions 265
Qualitative charge stability and Fukui function analysis of a model system with implications for chemical reactivity 371
chemiluminescence
Dipped adcluster model and SAC-CI method applied to harpooning, chemiluminescence and electron emission in halogen chemisorption on alkali metal surface 211
chiral zirconocenes
Highly isotactic polypropene prepared with rac-dimethylsilyl-bis(2-methyl-4-*t*-butyl-cyclopentadienyl)zirconiumdichloride: an NMR investigation of the polymer microstructure 67
cluster modelling
Cluster models for Brønsted acid centres in faujasites 347
clusters
Ligands on clusters - adsorbates on surfaces 195
^{13}-C-NMR metathesis polymerization
From ring-opening metathesis polymerization to Ziegler–Natta polymerization: a method for obtaining polynorbornene–polyethylene block copolymers 103
cobalt
New possibilities of NMR in mechanistic studies of homogeneous and heterogeneous catalysis 275
copolymerization
Homopolymerization and copolymerization of butadiene with a neodymium catalyst 83
crystal surface
Theoretical investigations on adsorption at ion crystal surfaces 171
cyclopentadienylneodymium complex synthesis
A useful method for the synthesis of neodymocene homogeneous catalysts for ethylene polymerization 75
deactivation
Mechanism of deactivation and reactivation of Ziegler–Natta catalysts for propene polymerization 29
density functional theory
Density functional theory and quantum chemistry: metals and metal oxides 117
Theoretical study of the reactivity of $(PPh_3)_2Pt(\eta^2\text{-}O_2)$ with acids 131
dioxygen
Theoretical study of the reactivity of $(PPh_3)_2Pt(\eta^2\text{-}O_2)$ with acids 131
electron donor
Role of electron donor in propylene polymerization using magnesium chloride-supported titanium tetrachloride catalyst 11
electron emission
Dipped adcluster model and SAC-CI method applied to harpooning, chemiluminescence and electron emission in halogen chemisorption on alkali metal surface 211
electronic processes
Quantum theory of scanning tunneling microscopy and spectroscopy and its application to surface electronic processes 253
electron spectroscopy: oxide surfaces
Adsorption and reaction of molecules on surfaces of metal–metal oxide systems 143
electrophilicity
Electrophilicity of titanium atoms supported on magnesium chloride 3
embedding theory
Embedded-cluster techniques for the quantum-mechanical study of surface reactivity 229
energy barrier
Theoretical studies in the realm of chemical reactivity: Noncatalytic and catalytic reactions 265
equations of electron emission
Extension of the range of applications of classic-phenomenological laws to the field of matter in a highly dispersed state 361
ethylene polymerization
Characterization of supported bimetallic catalysts for ethylene polymerization: the effect of external Lewis bases 17
ethylene polymerization catalyst
A useful method for the synthesis of neodymocene homogeneous catalysts for ethylene polymerization 75

excited state
Theoretical studies in the realm of chemical reactivity: Noncatalytic and catalytic reactions 265
Fourier transform NMR spectroscopy
New possibilities of NMR in mechanistic studies of homogeneous and heterogeneous catalysis 275
Fukui function analysis
Qualitative charge stability and Fukui function analysis of a model system with implications for chemical reactivity 371
gas phase
Theoretical aspects of methane dissociation and hydroxylation on metal oxide diatomics in the gas phase 425
Grignard reaction
A useful method for the synthesis of neodymocene homogeneous catalysts for ethylene polymerization 75
hafnium/titanium
Characterization of supported bimetallic catalysts for ethylene polymerization: the effect of external Lewis bases 17
halogen chemisorption
Dipped adcluster model and SAC-CI method applied to harpooning, chemiluminescence and electron emission in halogen chemisorption on alkali metal surface 211
harpooning
Dipped adcluster model and SAC-CI method applied to harpooning, chemiluminescence and electron emission in halogen chemisorption on alkali metal surface 211
Hartree–Fock
Embedded-cluster techniques for the quantum-mechanical study of surface reactivity 229
Hartree-Fock calculations
Theoretical study of the reactivity of $(PPh_3)_2Pt(\eta^2\text{-}O_2)$ with acids 131
heterogeneous catalysis
New possibilities of NMR in mechanistic studies of homogeneous and heterogeneous catalysis 275
heterogeneous Ziegler-Natta catalyst
Electrophilicity of titanium atoms supported on magnesium chloride 3
highly dispersed matter
Extension of the range of applications of classic-phenomenological laws to the field of matter in a highly dispersed state 361
homogeneous catalysis
New possibilities of NMR in mechanistic studies of homogeneous and heterogeneous catalysis 275
homogeneous catalyst
Behaviour of $[Ti_2(OEt)_8Cl]_2Mg_2(\mu\text{-}Cl)_2$ as catalyst component in the Ziegler–Natta polymerization of α-olefins and diolefins 45
homopolymerization
Homopolymerization and copolymerization of butadiene with a neodymium catalyst 83
hydrogen
Effects of hydrogen on the polymerization of propylene with a magnesium chloride supported Ziegler–Natta catalyst 37
hydroperoxides
Theoretical study of the reactivity of $(PPh_3)_2Pt(\eta^2\text{-}O_2)$ with acids 131
hydroxylation
Theoretical aspects of methane dissociation and hydroxylation on metal oxide diatomics in the gas phase 425
ionic crystal
Theoretical investigations on adsorption at ion crystal surfaces 171
isomerization
Time conditions for chemical reactions at the mesoscopic level in the elementary catalytic system 1-butene on ZnO 327
isotactic polypropene
Highly isotactic polypropene prepared with rac-dimethylsilyl-bis(2-methyl-4-*t*-butyl-cyclopentadienyl)zirconiumdichloride: an NMR investigation of the polymer microstructure 67
lanthanocene alkyl preparation
A useful method for the synthesis of neodymocene homogeneous catalysts for ethylene polymerization 75
Lewis base
Characterization of supported bimetallic catalysts for ethylene polymerization: the effect of external Lewis bases 17
ligands
Ligands on clusters – adsorbates on surfaces 195

lithium fluoride
Embedded-cluster techniques for the quantum-mechanical study of surface reactivity 229
local density functional calculation
Quantum theory of scanning tunneling microscopy and spectroscopy and its application to surface electronic processes 253
magnesium chloride
Electrophilicity of titanium atoms supported on magnesium chloride 3
Effects of hydrogen on the polymerization of propylene with a magnesium chloride supported Ziegler–Natta catalyst 37
magnesium chloride support
Role of electron donor in propylene polymerization using magnesium chloride-supported titanium tetrachloride catalyst 11
magnesium oxide
Theoretical investigations on adsorption at ion crystal surfaces 171
mechanistic studies
New possibilities of NMR in mechanistic studies of homogeneous and heterogeneous catalysis 275
mesoscopic scale reaction
Time conditions for chemical reactions at the mesoscopic level in the elementary catalytic system 1-butene on ZnO 327
metal oxide diatomics
Theoretical aspects of methane dissociation and hydroxylation on metal oxide diatomics in the gas phase 425
methane activation
Theoretical aspects of methane dissociation and hydroxylation on metal oxide diatomics in the gas phase 425
methanol oxidation
Molecular design of supported metal oxide catalysts: an initial step to theoretical models 443
molecular beam catalysis
Theoretical studies in the realm of chemical reactivity: Noncatalytic and catalytic reactions 265
molecular cluster
Electrophilicity of titanium atoms supported on magnesium chloride 3
molybdenum
New possibilities of NMR in mechanistic studies of homogeneous and heterogeneous catalysis 275
Mulliken population analysis
Electrophilicity of titanium atoms supported on magnesium chloride 3
neodymium catalyst
Homopolymerization and copolymerization of butadiene with a neodymium catalyst 83
neodymocene
A useful method for the synthesis of neodymocene homogeneous catalysts for ethylene polymerization 75
olefin
Non-metallocene group 4 organometallic complexes as catalysts for olefin polymerization: synthesis and catalytic activity of the cationic complex $[Zr(CH_2Ph)_3]^+ [B(CH_2Ph)(C_6F_5)_3]$ 57
olefin polymerization
Behaviour of $[Ti_2(OEt)_8Cl]_2Mg_2(\mu\text{-}Cl)_2$ as catalyst component in the Ziegler–Natta polymerization of α-olefins and diolefins 45
oxide catalysts
Charge sensitivity analysis of oxide catalysts: oxidation-state dependence of the normal-mode description of V_2O_5 surface clusters 383
oxygen transient species
Quantum chemical study of the reaction of ammonia with transient oxygen species 353
phenyl triethoxy silane
Role of electron donor in propylene polymerization using magnesium chloride-supported titanium tetrachloride catalyst 11
phenomenological laws
Extension of the range of applications of classic-phenomenological laws to the field of matter in a highly dispersed state 361
platinum
Theoretical study of the reactivity of $(PPh_3)_2Pt(\eta^2\text{-}O_2)$ with acids 131
PM3 level
Theoretical aspects of methane dissociation and hydroxylation on metal oxide diatomics in the gas phase 425
polymerization

Effects of hydrogen on the polymerization of propylene with a magnesium chloride supported Ziegler–Natta catalyst 37
Non-metallocene group 4 organometallic complexes as catalysts for olefin polymerization: synthesis and catalytic activity of the cationic complex $[Zr(CH_2Ph)_3]^+$ $[B(CH_2Ph)(C_6F_5)_3]$ 57
polynorbornene–polyethylene block copolymer
From ring-opening metathesis polymerization to Ziegler–Natta polymerization: a method for obtaining polynorbornene–polyethylene block copolymers 103
propene polymerization
Mechanism of deactivation and reactivation of Ziegler–Natta catalysts for propene polymerization 29
propylene
Effects of hydrogen on the polymerization of propylene with a magnesium chloride supported Ziegler–Natta catalyst 37
propylene polymerization
Role of electron donor in propylene polymerization using magnesium chloride-supported titanium tetrachloride catalyst 11
quantum chemical study
Adsorption of toluene on vanadium pentoxide surfaces. Quantum chemical study 457
quantum chemistry
Density functional theory and quantum chemistry: metals and metal oxides 117
Quantum chemical study of the reaction of ammonia with transient oxygen species 353
quantum chemistry of zeolites
Cluster models for Brønsted acid centres in faujasites 347
quantum-mechanical calculation
Electrophilicity of titanium atoms supported on magnesium chloride 3
quantum theory
Quantum theory of scanning tunneling microscopy and spectroscopy and its application to surface electronic processes 253
radical ion
Theoretical studies in the realm of chemical reactivity: Noncatalytic and catalytic reactions 265
Raman spectroscopy
Molecular design of supported metal oxide catalysts: an initial step to theoretical models 443
reaction dynamics
Time conditions for chemical reactions at the mesoscopic level in the elementary catalytic system 1-butene on ZnO 327
reactivation
Mechanism of deactivation and reactivation of Ziegler–Natta catalysts for propene polymerization 29
reactivity
Molecular design of supported metal oxide catalysts: an initial step to theoretical models 443
ring-opening
From ring-opening metathesis polymerization to Ziegler–Natta polymerization: a method for obtaining polynorbornene–polyethylene block copolymers 103
scanning tunneling microscopy
Quantum theory of scanning tunneling microscopy and spectroscopy and its application to surface electronic processes 253
silicon
Embedded-cluster techniques for the quantum-mechanical study of surface reactivity 229
size dependent behaviour
Extension of the range of applications of classic-phenomenological laws to the field of matter in a highly dispersed state 361
sodium chloride
Theoretical investigations on adsorption at ion crystal surfaces 171
stereospecific catalysis
Role of electron donor in propylene polymerization using magnesium chloride-supported titanium tetrachloride catalyst 11
stereospecific olefin polymerization
Highly isotactic polypropene prepared with rac-dimethylsilyl-bis(2-methyl-4-*t*-butyl-cyclopentadienyl)zirconiumdichloride: an NMR investigation of the polymer microstructure 67
structure

Molecular design of supported metal oxide catalysts: an initial step to theoretical models 443
supported bimetallic catalyst
Characterization of supported bimetallic catalysts for ethylene polymerization: the effect of external Lewis bases 17
supported catalyst
Effects of hydrogen on the polymerization of propylene with a magnesium chloride supported Ziegler–Natta catalyst 37
supported metal oxides
Molecular design of supported metal oxide catalysts: an initial step to theoretical models 443
surfaces
Ligands on clusters – adsorbates on surfaces 195
surface simulation
Theoretical investigations on adsorption at ion crystal surfaces 171
surface systems
Quantum theory of scanning tunneling microscopy and spectroscopy and its application to surface electronic processes 253
surface V_2O_5 clusters
Charge sensitivity analysis of oxide catalysts: oxidation-state dependence of the normal-mode description of V_2O_5 surface clusters 383
theoretical study
Theoretical studies in the realm of chemical reactivity: Noncatalytic and catalytic reactions 265
time course
Time conditions for chemical reactions at the mesoscopic level in the elementary catalytic system 1-butene on ZnO 327
titanacyclobutane
From ring-opening metathesis polymerization to Ziegler–Natta polymerization: a method for obtaining polynorbornene–polyethylene block copolymers 103
titanium chloride
Electrophilicity of titanium atoms supported on magnesium chloride 3
titanium oxide
Theoretical investigations on adsorption at ion crystal surfaces 171
titanium oxide surface
Charge sensitivity analysis of oxide catalysts: TiO_2(110) and (100) surface model clusters and H_2O adsorption 407
titanium tetrachloride
Role of electron donor in propylene polymerization using magnesium chloride-supported titanium tetrachloride catalyst 11
titanium tetraethoxide
Behaviour of $[Ti_2(OEt)_8Cl]_2Mg_2(\mu\text{-}Cl)_2$ as catalyst component in the Ziegler–Natta polymerization of α-olefins and diolefins 45
toluene
Adsorption of toluene on vanadium pentoxide surfaces. Quantum chemical study 457
transition-metal oxides
Density functional theory and quantum chemistry: metals and metal oxides 117
vanadia catalyst
Charge sensitivity analysis of oxide catalysts: oxidation-state dependence of the normal-mode description of V_2O_5 surface clusters 383
vanadium
New possibilities of NMR in mechanistic studies of homogeneous and heterogeneous catalysis 275
vanadium pentoxide
Adsorption of toluene on vanadium pentoxide surfaces. Quantum chemical study 457
water adsorption
Charge sensitivity analysis of oxide catalysts: TiO_2(110) and (100) surface model clusters and H_2O adsorption 407
zeolites
Cluster models for Brønsted acid centres in faujasites 347
Ziegler–Natta catalyst
Mechanism of deactivation and reactivation of Ziegler–Natta catalysts for propene polymerization 29
Behaviour of $[Ti_2(OEt)_8Cl]_2Mg_2(\mu\text{-}Cl)_2$ as catalyst component in the Ziegler–Natta polymerization of α-olefins and diolefins 45
Ziegler–Natta polymerization
From ring-opening metathesis polymerization to Ziegler–Natta polymerization: a

method for obtaining polynorbornene-polyethylene block copolymers 103
Ziegler-Natta catalyst
Effects of hydrogen on the polymerization of propylene with a magnesium chloride supported Ziegler-Natta catalyst 37
zinc oxide
Time conditions for chemical reactions at the mesoscopic level in the elementary catalytic system 1-butene on ZnO 327
